

PHS300

3G/4G Personal WiFi Hotspot

Create WiFi from Broadband USB Modem or Tethered Phone

EASY TO USE

The CradlePoint PHS300 Personal WiFi Hotspot is a true plug-in-play solution that creates a powerful WiFi network almost anywhere*. Simply connect up to 16 WiFi enabled devices by plugging in your USB mobile broadband data modem and turning on the PHS300. It's that easy to create you own hotspot wherever you are - no more searching or paying for WiFi when you're out and about.

COMPACT AND PORTABLE

Our most portable wireless router, the CradlePoint PHS300 comes standard with a fully rechargeable Li-Ion battery providing hours of access even when no power outlets are in sight. The PHS300 provides full WiFi functionality when recharging. At just under 3" x 5", the PHS300 is a perfection solution for those on the go. Take the PHS300 everywhere you need secure, reliable WiFi access.

SECURE AND RELIABLE

Powered by WiPipe™ technology, PHS300 requires minimal setup and maintenance, including pre-installed software for right-out-of-the-box simplicity. Standard in the PHS300 are security features like multiple WiFi-encryption modes like WEP and WPA/WPA2 (Personal & Enterprise) and built-in firewall, which prevent unauthorized use of your connection. With no additional software to load, you'll be up and running in minutes.

PHS300
