Introduction

The new **R-ADSL-C4-W-G1** is a fully featured Wireless ADSL2+ Modem Router which offers great performance, great style and increased functionality that can make genuine differences to your Internet experience.

Featuring a future-proofed ADSL2+ Modem which allows Broadband connection speeds of up to 24Mbps and of course being backward compatible with slower speeds if needed, the R-ADSL-C4-W-G1 is ideal for current and future Internet applications such as Video-on-Demand, Media Streaming, online Gaming and now comes complete with QoS (Quality of Service) functionality built-in.

With it's built-in 54Mbps 802.11g Wireless Access point (which can also act as a Wireless Bridge), *SignalSafe™* enhanced Wireless encryption together with an integrated 4-Port Fast Switch this Router offers style and practicality with an easy to use Web-based setup menu that's easy to use.

So for todays and tomorrows low-cost, high performance ADSL Routers look no further than the R-ADSL-C4-W-G1 – *only from Dynamode*
