

Wireless AC1200 Router

Powerful Dual Band AC router for a high performance network!

EM4505

EAN: 8716065318166

Mastercarton: 6

Packaging contents: EM4505, UTP Cable, Power Supply, Router stand, QIG, Warranty Registration Card, DOC

OVERVIEW

- Wireless Dual Band AC1200 Router and access point
- Separated antenna system: use the 2.4GHz and 5GHz band simultaneously
- Double bandwidth to avoid interferences and maximizing the wireless coverage
- Guest network (multiple SSIDs): share you wireless network with your family and friends
- Four 4dBi antennas for higher data transfer
- Four 10/100Mbps LAN ports
- Advanced wireless security: WEP, WPA, WPA2
- Perfect for online gaming and transferring music, videos and photos
- Backwards compatible with 54/11Mbps wireless devices and 10/100Mbps wired networks
- Extra features: QoS, WDS, Wlan Bridge, PPTP, VPN server, Parental control and traffic control
- Easy installation wizard in browser

SPECIFICATIONS

- Dimensions in mm. (WxHxD): 135x128x28
- Weight in grams: 216
- Power consumption : 4W
- Standard: Complies with 802.11ac/a/b/g/n standards
- System: 300Mbps on 2.4GHz band and 867Mbps on 5GHz band simultaneously
- Ports: 4 LAN 10/100Mbps ports, 1 WAN 10/100Mbps port
- Security: WEP, WPA and WPA2 wireless security, Firewall with Intrusion Detection and Stateful Packet Inspection
- General: Supports uPnP, WDS, Wlan bridge, DMZ, DHCP, QoS, Virtual server, NAT, DDNS, Port filtering, MAC address filtering, IP filtering and URL filtering, Parental control
- Configuration: Webbased
- Antenna: 4 x non-detachable 4dBi antennas

Wireless AC1200 Router

Powerful Dual Band AC router for a high performance network!

DESCRIPTION

The EM4505 Dual Band AC1200 Router is perfect for online gaming and transferring music, videos and photos. The special mounting bracket allows you to mount the router on the wall or place it on the table. The EM4505 is equipped with four antennas so you can use the 2.4GHz and 5GHz band simultaneously. The easy installation wizard in the browser guides you easily through the installation process. Create a separate network for your guests and give them access to the Internet without permitting them to your home network.

Dual Band Router: use the 2.4GHz and the 5GHz band at the same time

The EM4505 is a Concurrent Dual Band AC1200 Router. This means that you can use both the 2.4GHz and the 5GHz frequency at the same time. Despite the wider range of the 2.4GHz frequency, this band is very crowded and can endure many interferences. By using the 5GHz band you will have a cleaner frequency with less interferences.

Unique wizard for easy installation

Install and configure the EM4505 Dual Band AC1200 Router with the installation wizard in your browser. Do you have WPS-enabled wireless devices? You can use the WPS function to connect to your router.

Give your family and friends access to the Internet

Grant your family and friends access to the Internet. The EM4505 creates easily an extra guest network for your family and friends. They can surf on the Internet without having access to your private files.

Features for advanced network users

The Eminent EM4505 Concurrent Dual Band AC Router has many additional features like VPN (Virtual Private Network) and QoS (Quality of Service). With QoS you can assign priorities to data streams or applications. This is useful when you want to be sure that video streaming gets more bandwidth than online gaming.

Backwards compatible

The Eminent EM4505 Dual Band AC1200 Router is backwards compatible with other 802.11 b/g/n wireless devices and standard 10/100Mbit wired networks. To gain maximum speed and reach we advise you to use Eminent wireless network adapters.
