3G/4G WiFi Router

The pocket-sized 3GM2WN is packed with the latest connection, sharing and security features for reliable broadband access without boundaries. Ideal for travel, the device offers flexible 3G/4G or ADSL2+ broadband Internet connection options.

Sharing the connection is easy. Create an instant and portable WiFi zone for multiple devices such as laptops, PCs, gaming consoles, tablets and smart phones from public areas using a 3G/4G USB modem; or connect to an in-room ADSL2+ service via the Ethernet port.

When connecting your USB modem you are able to position the router in your home where you get the best possible signal and can also share the connection with multiple devices with the WiFi capability.

This router, with its small size and ability to work with fastest available mobile broadband modems will appeal to many users. Some practical applications include:

- ① Ideal for sharing with family and friends on holidays
- ② Share a 3G/4G connection with colleagues on a business trip
- ③ Temporary Internet connectivity at events and functions
- ④ Use the Ethernet port to connect to a hotel room cable to create your own WiFi hotspot

1 Maximum wireless signal rate and coverage values are derived from IEEE Standard 802.11g and 802.11n specifications. Actual wireless speed and coverage are dependent on network and environmental conditions included but not limited to volume of network traffic, building materials and construction/layout.
