

Important Information about the SpeedStream 6520, SpeedStream 6515:

Installation and Safe Usage Instructions:

1. Place the SpeedStream ADSL gateway in an upright horizontal orientation on a flat surface.
2. Connect the manufacturer supplied AC to DC power adapter. The SpeedStream 6xxx series gateways require the use of a 12 VDC, 1 A power adapter. Only use a manufacturer supplied and approved power adapter.
3. Connect the Ethernet cable (provided) to the RJ45 port on the SpeedStream ADSL Gateway labeled "Ethernet". Then connect the other end of the Ethernet Cable then to the Ethernet port of a computer. Repeat as necessary for the available Ethernet ports.
4. If a USB port is available, connect the "B" end of the provided USB cable to the port on the SpeedStream ADSL Gateway labeled "USB". Then connect the "A" end of the USB Cable to the USB host port of a computer.
5. Connect the provided DSL Cable to the port on the SpeedStream ADSL Gateway labeled "DSL". Connect the other end of the DSL Cable to a standard Phone Jack. **Always use a DSL cable with a minimum wire gauge of 26AWG.**
6. If using a USB port, use the SpeedStream CD to configure the computer's USB connection.

When using this device, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons including the following:

1. Do not use this product near water and avoid contact with moisture. For example, do not use near a bathtub, wash bowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool. Care should be taken so that liquids are not spilled on this equipment.
2. Never insert objects into the vents of this equipment as this can result in the risk of electrical shock or fire.
3. This equipment should only be operated from the type of power supply indicated on the marking label.
4. Do not overload wall outlets or extension cords. Doing so can result in the risk of fire or electrical shock.
5. Avoid blocking any vent openings or exhaust exits on this equipment. Do not place equipment in a built-in installation such as a cabinet that may impede the flow of air through the ventilation openings.
6. The equipment should be situated away from heat sources such as radiators, heat registers, stoves, or other heat producing appliances and equipment.
7. Care should be taken to ensure that the power cord is routed, so it is not likely to be walked on or pinched by items placed upon or next to it.
8. Unplug this equipment before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning only.
9. This equipment is not user serviceable and is to be serviced by qualified personnel only. Do not disassemble this equipment. If service is required, disconnect all power and phone lines from the equipment and consult qualified service personnel.

Federal Communications Commission (FCC) Statements

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Modifications:

You are cautioned that changes or modifications not expressly approved by the party responsible for compliance could void your authority to operate the equipment.

Radio Frequency Interference Statement

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

FCC Terminal Equipment Statements

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the bottom side of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the Telephone Company. A copy of the Suppliers Declaration of Conformity to the FCC Part 68 and ACTA requirements can be found at:

<http://www.part68.org>.

This equipment has a Universal Service Order Code (USOC) of RJ11C, a Facility Interface Code (FIC) of 02LS2, and a Service Order Code (SOC) of 7.0Y. The Telephone Company may request this information when ordering service for this equipment.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the Telephone Company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The Telephone Company may make changes to its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the Telephone

Company will provide advance notice so you can make the necessary modifications to maintain uninterrupted service.

This equipment is not user serviceable. If trouble is experienced with this equipment, for repair or warranty information, please contact Siemens at:

Siemens Technical Support Services: USA Telephone: +1 (972) 852-1000 Email: usa.800siemens@icn.siemens.com RMA service hours: 8:00am - 5:00pm (CST) Monday - Friday	Siemens Subscriber Networks, Inc. 4849 Alpha Road Dallas, TX 75244 Attn: RMA #

If the equipment is causing harm to the telephone network, the Telephone Company may request that you disconnect the equipment until the problem is resolved.

This equipment is not intended for use on public coin phone service provided by the Telephone Company. Connection to party line service is subject to state tariffs. (Contact the state public utility commission, public service commission or corporation commission for information.)

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

This equipment connects to the telephone network that can be vulnerable to electrical surges as a result of lightning strikes and other events. Such events can be very destructive to equipment connected to both the telephone network and to AC power sources. It is strongly recommended that a surge arrester be used to connect this equipment to AC power in order to reduce the possibility of damage resulting from such events.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device produces radio frequency energy in the 2.4 GHz spectrum. The antenna should be positioned to keep a minimum distance of 20cm from the radiating element to any nearby person.

Industry Canada Statements

This Class B digital apparatus complies with Canadian ICES-003.
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number displayed on the equipment label. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

Before installing this equipment, users should ensure that it is permissible to be connected to the facilities of the local Telecommunications Company. The equipment must also be

installed using an acceptable method of connection. The customer should be aware that compliance with the above conditions may not prevent degradation of service in some situations. Repairs to certified equipment should be coordinated by a representative designated by the supplier. Any repairs or alterations made by the user to this equipment, or equipment malfunctions, may give the telecommunications company cause to request the user to disconnect the equipment. Users should ensure for their own protection that the electrical ground connections of the power utility, telephone lines, and internal metallic water pipe system, if present, are connected together. This precaution may be particularly important in rural areas. Caution: Users should not attempt to make such connections themselves, but should contact the appropriate electric inspection authority, or electrician, as appropriate.

The SpeedStream 6520, and SpeedStream 6515, comply with Canadian RSS-210.

NOTICE: To prevent radio interference to the licensed service, this device must be operated indoors only and should be kept away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing by Industry Canada. Modification of antenna gain or transmit power may require a radio license from Industry Canada.
