Important

The reset to factory default settings procedure erases all of the configuration settings saved on the router.

Wi-Fi Connection to the Router

You need to establish a direct connection with the router in order to access the web-based configuration utility.

Once you have configured your router, you will be able to connect to the Internet using the Wi-Fi settings that you have specified in the configuration process.

Before starting the setup process, ensure that the router is powered on and has sufficient battery power.

Also make sure your PC is configured to obtain both IP and DNS server addresses automatically.

Please refer to your system's documentation for instructions on how to do this.

To connect to the router using Wi-Fi, follow these steps.

Per connettersi al router tramite Wi-Fi, procedere come segue.

1. Open your operating system's wireless networking utility and scan for available networks to connect to.

The default network name (SSID) of the 3G Router is "Hamlet-3G-xxxx", where "xxxx" represents the last four characters of the router's MAC address.

2. Once you have located this network, click "Connect" button.

3. You will then be prompted to enter the network security key (Wi-Fi Key) for your router.

The Wi-Fi Key is printed on the rear panel of the router.

4. Enter the security key and click "OK" or "Next".
