Quick Installation Guide

TEG-S081Fi

Table of Contents

1. Before You Start

	Package Content
	• TEG-S081Fi • Accessories • AC power cord • RS-232 cable • Quick Installation Guide • User's Guide CD ROM

System Requirements

1. Workstations with network cards
2. TCP/IP protocol installed in all workstations
3. A web browser such as Internet Explorer or Netscape Navigator
4. Multimode Fiber cable with SC-type connectors.
5. Multimode Fiber converters with SC-type connectors or a switch with an SC-Type Fiber port.

8-Port 100Base-FX Layer 2 Managed Switch with GBIC Slot
(TEG-S081Fi)
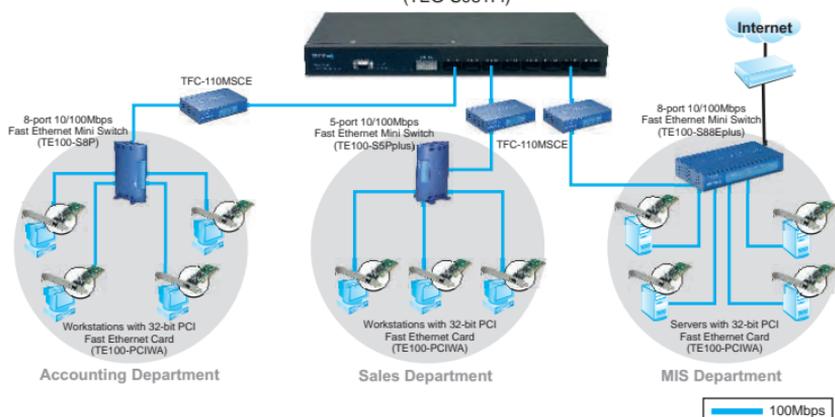

2. How to Connect

1. Connect the AC Power cord to the back of the TEG-S081Fi.

2. Connect the fiber cable to the front of the switch and your Network.

3. Verify that the **PWR** led displays a solid green light.

3. Using the Switch

1. Go to **Start** ? **Settings** ? **Control Panel.**
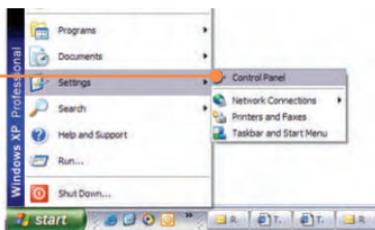

2. Double-Click the **Network Connection** Icon.
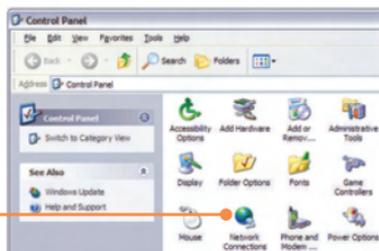

3. Right-Click **Local Area Connection,** and select **Properties.**

4. Please configure your PC's IP address to 192.168.16.x.
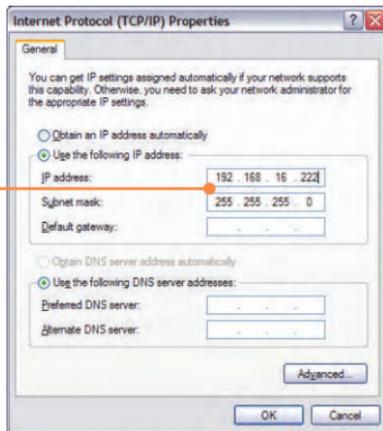

5. Open your web browser, type **http://192.168.16.1,** and press **Enter**.
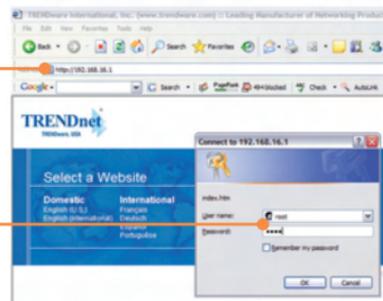

6. User Name: **root**
   Password: **root**

7. Select the appropriate option to configure the SNMP switch.

Your installation is now completed.

Note: For more detail on advanced features, please consult the User's Guide.

Q1. How come I cannot see any light from any of my LED's?

    A1. Your TEG-S081Fi is not getting any power. Make sure that your surge protector or your outlet is getting power and make sure that the AC Power cord is properly connected to your TEG-S081Fi .

Q2. I connected my fiber converter to the TEG-S081Fi using a Multimode Fiber cable with SC connectors. However, the network activity LED does not blink. What should I do?

    A2. Go to the TEG-S081Fi and move the connector that was in the **transmit** side to the **receive** side, and the other connector that was in the **receive** side to the **transmit** side.
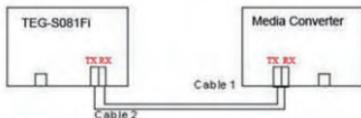

Q3. I changed my IP settings to 192.168.16.222 to access the switch, but I still cannot get into the Web configuration page. What should I do?

    A3. Make sure there is no other network device using the same IP address. Afterwards, consult the User's Guide to access the switch through the Console Port. Once you reach the command line interface, perform a factory reset and try again.

Q4. I performed a factory reset on the TEG-S081Fi, but I still cannot access the web configuration page. What should I do?

    A4. If you are configuring more than one TEG-S081Fi, then it is possible that you are experiencing IP conflict between these two switches. Please configure each switch one at a time, and make sure you assign a unique IP address to each switch.

If you have any questions regarding the TEG-S081Fi, please contact TRENDnet's Technical Support Department.

Certifications

This equipment has been tested and found to comply with FCC and CE Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.
(2) This device must accept any interference received.
    Including interference that may cause undesired operation.

Waste electrical and electronic products must not be disposed of with household waste. Please recycle where facilities exist. Check with you Local Authority or Retailer for recycling advice.

NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.
