Power Adapter

CD-ROM with Installation Guide, User Manual, and Special Offers

Note: Using a power supply with a different voltage than the one included with the DAP-2310 may damage the unit and will void the warranty for this product.

If any of the above items are missing, please contact your reseller.

Hardware Overview
LEDs

1	Power LED	This light will be solid green when the unit is powered on.
2	WLAN LED	This light will be flickering green when the 2.4GHz frequency is in use.
3	LAN LED	This light will be flickering green when there is active LAN traffic.

Connections

1	**LAN Port**	Connects the DAP-2310 to a switch or PC.
2	**Reset**	Reset the Access Point.
3	**Power Receptor**	Receptor for Power Adapter.

Getting Started

1. You will need broadband Internet access.
2. Consult with your cable or DSL provider for proper installation of the modem.
3. Connect the Cable or DSL modem to a router.
4. If you are connecting a desktop computer to your network, install a wireless adapter into an available slot on your desktop computer.
5. Install the drivers for your wireless adapter into a laptop computer.

Connecting the
DAP-2310 to your network

1. Connect the power adapter to the receptor on the rear panel of the DAP-2310 and then plug the other end of the power adapter to a wall outlet or power strip. The power LED will turn ON to indicate proper operation.

2. Using an Ethernet cable, insert one end of the cable to the LAN port on the rear panel of the DAP-2310 and the other end of the cable to a switch or router's LAN port .

   Note: You can also connect the DAP-2310 directly to the computer that will be used for configuration. The LAN LED will illuminate to indicate a proper Ethernet connection.
3. Computers with 802.11 b/g/n wireless adapters can connect to the DAP-2310.

Using the Configuration Menu

To configure the DAP-2310, use a computer that is connected to the DAP-2310 with an Ethernet cable (see the *Network Layout diagram*).Launch your web browser.

Type the IP address of the DAP-2310 in the address field (**http://192.168.0.50**) and press **Enter**. Make sure that the IP addresses of the DAP-2310 and your computer are in the same subnet.

Note: If you have changed the default IP address assigned to the DAP-2310, make sure to enter the correct IP address.

Enter the user name (**admin**) and your password. Leave the password field blank by default and click **Login**.

Note: If you have changed the password, make sure to enter the correct password.
