XWN5001
Ethernet cable

**NETGEAR recommends that you *do not* plug a Powerline device directly into a power strip.**

Hardware Features

Powerline 500 WiFi Access Point (XWN5001)

Power LED · Powerline LED · Wireless LED

Security button

Factory Reset button

Ethernet port · On/Off switch · Ethernet LED

LED Descriptions

The LEDs indicate the status of your Powerline device.

- When you plug in the Powerline device, the Power LED ⏻ lights and turns green.

- The Ethernet LED 🔀 lights and turns green when you connect a powered-on Ethernet device to at least one Ethernet port. If the LED is off, there is no Ethernet connection.

- The Wireless LED ◉ lights and turns green when the wireless radio is on.

- The Powerline LED lights when the Powerline device detects at least one other compatible Powerline device.

    The Pick A Plug feature lets you pick the electrical outlet with the fastest link rate.

    - 🔼 Green: Link rate > 80 Mbps (Fast)
    - 🔼 Amber: Link rate > 50 and < 80 Mbps (Medium)
    - 🔼 Red: Link rate < 50 Mbps (Slow)

Button Descriptions

The buttons on your Powerline device let you do the following:

- Factory Reset button: Use the Factory Reset button to return your Powerline device to its default factory settings. Press the **Factory Reset** button for 2 seconds, and then release it.
- Power On/Off switch: Use the On/Off switch to turn the device on and off.
- Security button: The Security button has three functions:
  - Secure the Powerline network.
  - Create a WiFi access point on the XWN5001 that has the same wireless settings as your router or gateway.
  - Automatically connect your wireless client to the XWN5001 WiFi access point.

Install the Access Point and Surf the Web with WiFi

1. Secure your Powerline network.

These instructions assume that you already have a Powerline network that includes at least 2 Powerline devices and that you want to add the XWN5001 to your network.

a. Make sure that the Power LED is solid green on each Powerline device.

b. On a Powerline device that is connected to your existing Powerline network, press the **Security** button for 2 seconds, and then release the button. The Power LED blinks green while the device is setting up security.

c. Within 2 minutes, press the **Security** button on the XWN5001 for 2 seconds, and then release the button.
d. After a few seconds, the security is set and the Power LEDs turn solid green.
The Powerline devices can communicate over the Powerline network in a secure way.
2. Plug one of your Powerline devices into a wall outlet near your router or gateway.

If you want to share Internet access across your home, make sure to connect the Powerline device to your Internet gateway with an Ethernet cable.

Existing Powerline Network

Room 1

Room 2

Powerline device is connected to router or gateway.
3. Plug the XWN5001 into a wall outlet where you need WiFi coverage.

Existing Powerline Network

Add a WiFi Access Point

Room 1   **Room 2**   **Room 3**
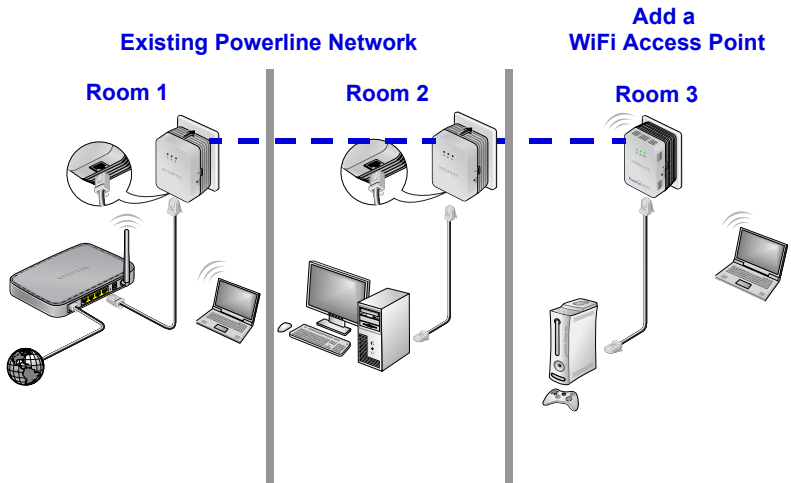

Note: You can connect an Ethernet-based device (like a game console, set-top box, or Blu-ray player) to the Internet and the home network with the additional Ethernet port on the XWN5001.

This room has an XWN5001 WiFi access point.
4. Set up WiFi access on your XWN5001 access point.

You can set up WiFi access on your XWN5001 access point in one of two ways:

- **Option 1**: Use NETGEAR genie to manually configure the wireless settings of your XWN5001 access point.

    a. Install NETGEAR genie. (See *Install NETGEAR genie* on page 19.)

    b. Temporarily connect your computer directly to the XWN5001 through the Ethernet port.

    c. Launch NETGEAR genie on your computer and click **Network Map** or select it from the menu.

d. Click the Powerline icon on the Network Map screen. The Powerline Utility screen displays:
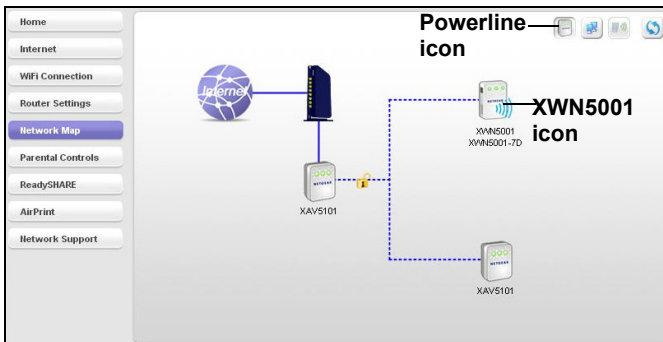

e. On the Powerline Utility screen, right-click the XWN5001 icon.

f. From the pop-up menu that displays, select **Wireless configuration**.

g. Enter the following wireless settings:
- Wireless Network Name (SSID)
- Wireless Security Type
- Passphrase

Wireless Setting

Wireless Setting

Enter the wireless setting for the XWN5001 :

Wireless Network Name (SSID) : | Netgear_EXT

Wireless Security Type : | None

Apply   Cancel

If you have a NETGEAR router installed in your network, this Wireless Setup Wizard offers a quick wireless extender setup for the XWN5001. Make sure your router is connected on your network, then click "Search my NETGEAR Router" for the quick setup.

Search my NETGEAR Router.

Advanced Wireless Setting

For the advanced wireless configuration, click here 10.0.0.12 to login to the web page of the XWN5001.

If you want to clone your existing wireless network, enter the same wireless settings that your router or gateway uses. When you are roaming in your house, your wireless client (laptop, tablet, or smartphone) switches from one network (router or gateway) to the other (XWN5001), depending on the signal quality.

If you want to create a new wireless network, enter new wireless settings. Creating a new wireless network lets you have a second network in another zone of your house.

h. Click **Apply** to save your changes.

i. When you are finished with the wireless settings, disconnect the Ethernet cable from the XWN5001.

Note: You can access advanced wireless settings by right-clicking the device icon and selecting the IP address on the pop-up menu. The login and password are **admin** and **password**.

- • **Option 2**: Use the web browser setup guide to manually configure the wireless settings of your XWN5001 access point.

  On your computer or wireless device (tablet, smartphone):

  a. Open the software that manages your wireless network connections and connect to the XWN5001 network.

Tip: The default wireless network name (SSID) of the XWN5001 is NETGEAR_EXT. The default network key (wireless security password) is printed on the back of the XWN5001.

b. On the same computer or wireless device, open a web browser window.

The browser takes you directly to the onscreen setup guide. If it does not, enter one of the following into the browser address bar:

www.mywifiext.net

www.netgearextender.net

c. When prompted to log in, enter:

- User name: **admin**
- Password: **password**

The web browser setup guide helps you configure the wireless settings of the XWN5001.

If you want to clone your existing wireless network, enter the same wireless settings that your router or gateway uses.

If you want to create a new wireless network, enter new wireless settings. Creating a new wireless network lets you have a second network in another zone of your house.

Record the new wireless settings here:

Wireless network name (SSID)

_____

Network key (Passphrase)

_____

5. Connect your wireless client (laptop, tablet, or smartphone) to the XWN5001 for Internet access.

- **Option 3**: Use the WPS button on your wireless client to automatically connect to the XWN5001 access point.

  a. Press the **Security** button on the XWN5001 for 2 seconds and release it.

  The Wireless LED starts to blink.

  b. Press the **WPS button** on your Wireless client for 2 seconds and release it.

  When the Wireless LED stops blinking, your wireless client is automatically connected to the XWN5001 access point and you can surf the web.

- **Option 2**: Manually connect to the XWN5001 access point.

  On your computer or wireless client (tablet, smartphone):

  a. Open the software that manages your wireless network connections.

  b. Connect to the XWN5001 wireless network (SSID).

  c. Enter the network key (passphrase).

  Your wireless device is now connected to the XWN5001 access point and you can surf the web.

Install NETGEAR genie

Follow these instructions to download and install NETGEAR genie on your computer.

1. Type **http://support.netgear.com** into your browser address bar.

2. Click the **For Home** button.

3. In the search box, type **xwn5001**.

4. Download the NETGEAR genie that corresponds to your OS environment (Windows or Mac).

5. Run the file that you downloaded and follow the onscreen instructions to install NETGEAR genie.

Compatible NETGEAR Powerline Devices

Your Powerline device can share a Powerline network with these compatible NETGEAR devices: XAVB1301, XAVB1401, XAVB2101, XAVB2602, XAVNB2001, XAVB5601, XAVB5101, XAVB5201, XAVB5602, XAUB2511, XAVB5004, XAVB1004, XWNB5602, XWNB5201, and XWNB1601.

For a complete list of HomePlug AV certified devices, visit *www.homeplug.org/certified_products*.

Safety Information

AC input: 100–240V, 250 mA or 0.25A (max.)
Operating temperature: 0°C–40°C

User Manual

You can get the user manual online at
http://downloadcenter.netgear.com or through a link in the product's user
interface.
